1.Parts and Functions

2.Mounting

Mounting

Placing Name Label

Use a screwdriver to unscrew the screw, and cock the host , then Placing Name Label.

3.Terminal Descriptions

- **Lock Control Jumper:** To select the lock type.
- **Main Connect Port:** To connect the bus line and the electronic locks.
- **BUS:** Connect to the bus line, no polarity.
- **PL:** External lock power input, connect to the power positive(power +).
- **S+:** Lock power(+) output.
- **S-:** Lock power(-) output, connect to the power(-) input of locks(only when using the camera to power the locks, if using the external power supply for the locks, the S- will not be connected).

4. System Wiring and Connections

Basic Connection

Electric Lock Connection

Door Lock Controlled with Internal Power

Note:

1. Electronic lock of Power-on-to-unlock type should be used.
2. The door lock is limited to 12V, and holding current must be less than 250mA.
3. The door lock control is not timed from Exit Button(EB).
4. The **Unlock Mode** Parameter of Monitor must be set to 0 (by default).

1 2 3
 Connect one lock

Jumper position in 2-3

Door Lock Controlled with Dry Contact

Note:

1. The external power supply must be used according to the lock.
2. The inside relay contact is restricted to AC or DC 24V/1A.
3. The jumper must be taken off before connecting.
4. Setup the **Unlock Mode** of Monitor for different lock types.
 - Power-on-to-unlock type:Unlock Mode=0 (by default)
 - Power-off-to-unlock type:Unlock Mode=1

Unlock parameter setting(set in monitor)

- 1.Touch **About** item on main menu page.

- 4.A digital keypad and setting instructions will be showed.

- 2.Touch the screen anywhere and hold for 2s.

- 3.Touch Installer setup item

Note:

- 1.must connect correctly before setting.
- 2.the parameter will be saved automatically,so you need only set on one monitor.
- 3.the above diagram is fit for icon menu series monitors, to text menu series monitors,please refer to the corresponding user manual.

Multi Door Stations Connection

Multi Monitors Connection

Basic IN-OUT Wiring Mode

With DBC4 Wiring Mode

Extending Connections with DCU unit

Note: About DCU instructions, please refer to the user manual for more detail informations.

5. Functions Setting Up

This section explains the settings of each function, please refer to the following table:

About the setting mode:

Input the master code to switch to the setting mode, and input the corresponding setting code to perform the settings for the function you want. After settings have been made, input the following setting codes to continue the setting operation. Press "*" to exit the setting mode.

- The example is set * as cancel button and # as confirm button, please refer to */# function setting for detail information.
- Forbid to slide to touch the digital keypad, it may cause mistaken key, the correct operation is using your finger to press the digital you desired.
- You should press "confirm" button after finish inputting the code number each time, otherwise, the operation will be canceled automatically in 10s.

| Order | Setting items | Setting range | Default value | Setting code |
|-------|---------------------------------------|---|---------------|--------------|
| 1 | Reset all settings | 1234 | - | 00 |
| 2 | Setting the master code | 1 ~ 12 digits Valid keys:0 ~ 9 | 1234 | 01 |
| 3 | Setting the key illumination time | 10 to 99 seconds/ continually lit | 10 seconds | 02 |
| 4 | Setting the unlock time | 01 to 99 seconds | 1 seconds | 03 |
| 5 | Setting the unlock mode | 0:opened/1:closed | opened | 04 |
| 6 | Operation tone settings | 0:on/1:off | on | 05 |
| 7 | Reset code settings | 1234 | - | 06 |
| 8 | *&# function settings | 0:Normal/1:Reverse | Normal | 07 |
| 9 | Call tone settings | 0:Enable/1:Disable | Enable | 08 |
| 10 | Interference resistant grade settings | Valid keys:0 ~ 5 | 2 | 09 |
| 11 | MIC Adjustment | Valid keys:0~9 | 7 | 10 |
| 12 | SPK Adjustment | Valid keys:0~9 | 7 | 11 |
| 13 | Display Scene | Valid keys:0~2 | 0 | 12 |
| 14 | Night Light Level | Valid keys:0~5 | 4 | 13 |
| 15 | Device Address | Valid keys:0~3 | 0 | 14 |
| 16 | Reserve(not used) | Reserve | Reserve | 15~17 |
| 17 | Setting the code forTemporary1 | 1 ~ 12 digits Valid keys:0~9 | - | 18 |
| 18 | Setting the code forTemporary2 | 1 ~ 12 digits Valid keys:0~9 | - | 19 |
| 19 | Setting the code for user group1 | 1 ~ 12 digits Number of codes:40 Valid keys:0~9 | - | 20~59 |
| 20 | Setting the code for user group2 | 1 ~ 12 digits Number of codes:40 Valid keys:0~9 | - | 60~99 |
| 21 | Work Mode | 0:A partment/1:Villa | 1(villa) | 100 |
| 22 | Call Address | Valid keys: 0 - 9 | 00 | 101 |

Each operation is indicated by the lighting up of the different color of digital key and nameplate, and by the sounding of the buzzer.

| <ul style="list-style-type: none"> - When the “ * cancel” key is pressed, the indicator will show its standby color, the buzzer beeps, and the system exits the setting mode. - When there isn't any operation in 10s, the indicator will show its standby color, the buzzer beeps, and the system exits the setting mode. - When setting failure, the color of key indicator will turn red, the buzzer beeps. | The color of key indicator (The color of standby) \ Beep, Beep+ |
|---|---|

- All settings will restore to their default value.
- When power on or activate the reset all setting item, the keypad checking will carry out, during this time, the key illumination will blink and the touching operation is forbidden, after finish checking, the key illumination will stop blinking and sent out a long sound of beep

- The master code is allowed 1~12 digits, the same code cannot be set for both the user code and the master code, it is recommended that you modify the default master code.

- If the key illumination time is set to 00, the key illumination will light up all the time when power on.
- If the key illumination time is set to 10~99, the key illumination will light up for 10~99 seconds. At this mode, the key illumination lights off in standby mode, touching any digital key can illuminate, but this is the invalid digital.

- The unlock time can be set on both monitor and door station, and the valid value is the number you set last time.

Input the master code.

- When the “ * cancel” key is pressed, the indicator will show its standby color, the buzzer beeps, and the system exits the setting mode.
- When there isn't any operation in 10s, the indicator will show its standby color, the buzzer beeps, and the system exits the setting mode.
- When setting failure, the color of key indicator will turn red , the buzzer beeps.

The color of key indicator
(The color of standby) Beep, Beep+

- If the item is set to 0, the unit will respond a call tone when pressing the “CALL” button.
- If the item is set to 1, the unit will have no responds when pressing the “CALL” button.

- The larger you set the interference resistant grade, the stronger it will be, but the sensitivity of the keypad will be more lower.
- The interference resistant grade setting also will activate the keypad checking.

- Unlock via password is still available even when the door station is talking.
- When door station is talking, you can enter the Master code (the LED turns white upon that) to activate the volume adjusting function:
* MIC adjustment: 1 (up), 4 (down);
* Sleaker adjustment: 3 (up), 6 (down).

Input the master code.
(Default: [1 2 3 4] +[#])

The color of key indicator (white) Beep+, Beep

13. Display scene setting (Default : 0) 14. Night light level setting (Default : 4) 15. Device address setting (Default:0)

- When input the correct temporary password to release the door, the system will clear the temporary password after 60 seconds automatically. But you should know that the password is valid within 60 seconds after inputting the correct temporary password
- The temporary1 is used to release the first lock, and the temporary 2 is used to release the second lock (the second lock need external device to support).
- If the password length exceeds 12 digits, the system will sent out the sound of "beep,beep,beep,beep", and the digitals you input before will be cleared at the same time.
- The temporary code can not be set the same as the master code and user code.

- The user code group1 is used to release the first lock, and the user code group2 is used to release the second lock (the second lock need external device to support).
- The user code group1 and user code code group2 can contain 40 group passwords
- If the password length exceeds 12 digits, the system will sent out the sound of "beep,beep,beep,beep", and the digitals you input before will be cleared at the same time.
- The user code can not be set the same as the master code and temporary code.

Input the master code.
(Default: [1 2 3 4]+[#])

- When the “ * cancel” key is pressed, the indicator will show its standby color, the buzzer beeps, and the system exits the setting mode.
- When there isn't any operation in 10s, the indicator will show its standby color, the buzzer beeps, and the system exits the setting mode.
- When setting failure, the color of key indicator will turn red , the buzzer beeps.

The color of key indicator
(The color of standby) Beep, Beep+

- Work mode setting:
0(a partment)/1:(villa).

- When the work mode is villa, the call address:00 or 16.
- When the work mode is a partment, the range of call address:00~31.

6. Power Supply Instructions

| Name | Discription | Usage |
|--------------------|---|---|
| DPA-PS5-24V | Power supply,85~260Vac input,24Vdc/3A output,10 DIN modules | Connect with multi doorstations or multi monitors(up to 2 or above) |
| DPA-PS4-24V | Power supply,85~260Vac input,24Vdc/1A output,for basic kit only,4 DIN modules | Connect with one doorstation and one monitor(DPM-D235 can be connected two) |

7. Precautions

- Please clean the unit with soft cotton cloth, don't use the organic impregnant or chemical clean agent. If necessary, please use a little pure water or dilute soap water to clean the dust.
- The unit is weather resistant. However do not spray high pressure water on access control keypad directly. Excessive moisture may cause problems with the unit.
- You must use the right adaptor which is supplied by the manufacture or approved by the manufacture..
- Pay attention to the high voltage inside the products, please refer service only to a trained and qualified professional.

8. Specifications

- Power Supply : DC 24V (supplied by PS4-24V or PS5-24V);
- Power Consumption: Standby 60mA; Working status 200mA;
- Camera: Color ARS; 420 TV Lines;
- Unlocking time: 1~99s
- Lock Power supply: 12Vdc, 300mA(Internal Power);
- Number of relay circuits: 2(the second lock need external device to support)
- Mounting: Surface mounting
- Working temperature: -10°C ~ +45°C
- Dimension: 182(H)×93(W)×44(D)mm

9.Cables Requirements

The maximum distance of the wiring is limited in the DT system. Using different cables may also affect the maximum distance which the system can reach.

When Monitor quantity < 20

| Cable Usage | A | B | C |
|--------------------------------------|----|----|----|
| Twisted cable 2x0.75 mm ² | 60 | 60 | 30 |
| Twisted cable 2x1 mm ² | 80 | 80 | 40 |

When Monitor quantity > 20

| Cable Usage | A | B | C |
|-------------------------------------|----|----|----|
| Twisted cable 2x1 mm ² | 70 | 30 | 20 |
| Twisted cable 2x1.5 mm ² | 70 | 50 | 30 |

Note: If the monitor has been specified the distance, refer to the parameter.
