# Quick Installation Guide

## Wall Mounting

**1** Prepare the mounting accessories.

**2** Attach each of the 4 wall hanging accessories to the track on the back of the box with screws.

Install the mounting accessories

**3** Drill holes in the marked position on the wall. Then put the expansion screws into the wall and fixed the box using the screws.

Mark the holes and install expansion screws

## Pole Mounting

**1** Prepare the mounting accessories.

**2** Install the clips in the hoop fitting into the track.

Install the clips

**3** Thread the cable tie into the hole in the clips, and finally adjust the cable tie according to the size of the pole.

Thread the cable tie and tighten

## Remove Side Panel

**1** Remove the screws holding the side panels on the inside of the Box.

Remove the screw

**2** Slide the board on the side of the box left and right to remove the board.

Slide the side panel

**3** Insert the cable through the waterproof connector.

Insert the cable

## Din-Rail Installation

**1** Remove the screws on the back plate of the box.

**2** Place the nuts behind the holes and grooves of the back plate, then put the DIN- rail bracket on the surface of the back plate and fix the DIN-rail bracket by aligning the screws with the hole of the back plate. After the installation of the DIN-rail is completed, the back plate will be fixed with screws.

Fix the DIN-rail bracket by aligning the screws with the hole of the back plate.

Fix the back plate with screws.
