

Intelligent Cloud Management Server Mechanical Hard Disk Drive Installation Guide

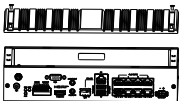

Parts List

Mechanical Hard Disk Drive Power Cable x 1 Mechanical Hard Disk Drive Data Cable x 1
Shockproof Gasket x 4 Mechanical Hard Disk Drive Bracket x 2 Thermal Pad x 2
Heating Film x 1 Pan Head Screw x 4 Flat Head Screw x 4

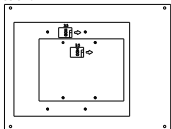

NOTE! The package contents may vary with device model and version.

Disk Installation

1. Unscrew the four corner screws on the top of the device and remove the top cover.

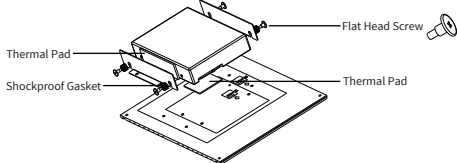

2. The mechanical hard disk drive should be installed on the back of the top cover, with the mechanical hard disk drive's connection interface aligned with the printed arrow direction.

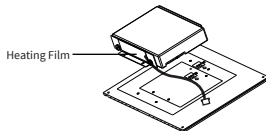

3. Install the thermal pad and mechanical hard disk drive bracket.

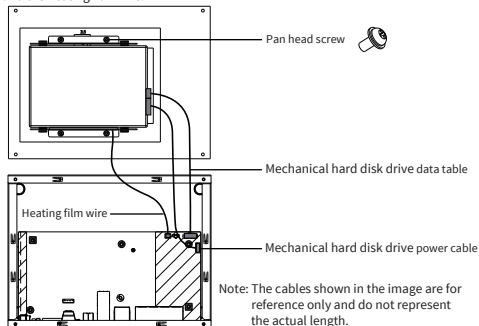

- (1) After peeling off the protective films on both sides of the thermal pad, paste it in the following position. The square thermal pad at the bottom should be attached to the motor position at the bottom of the mechanical hard disk drive.
- (2) Use the shockproof gaskets and flat round head screws to secure the mechanical hard disk drive to the mechanical hard disk drive bracket.

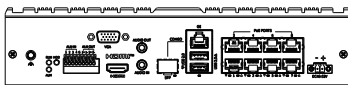

4. Attach the heating film on the same side as the thermal pad. When attaching, ensure that the direction of the heating film's wire matches the direction of the mechanical hard disk drive's connection interface.

5. Align the installation holes of the mechanical hard disk drive bracket with the installation holes of the top cover and secure it using the pan head screws. Connect the mechanical hard disk drive power cable, mechanical hard disk drive data cable, and the heating film wire.

6. Secure the top cover of the device to complete the installation.

Intelligent Cloud Management Server SSD Installation Guide

Parts List

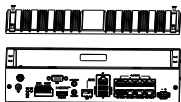

SSD Power Cable x 1 SSD Data Cable x 1 Shockproof Gasket x 4

SSD Bracket x 2 Pan Head Screw x 4 Flat Head Screw x 4

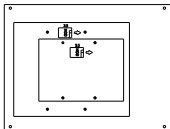

NOTE! The package contents may vary with device model and version.

Disk Installation

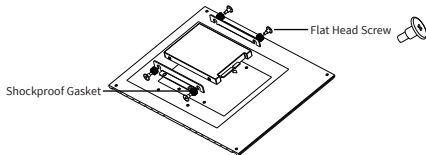

1. Unscrew the four corner screws on the top of the device and remove the top cover.

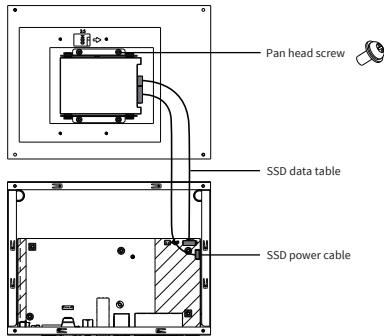

2. The SSD should be installed on the back of the top cover, with the SSD's connection interface aligned with the printed arrow direction.

3. Use the shockproof gaskets and flat head screws to secure the SSD to the SSD bracket.

4. Align the installation holes of the SSD bracket with the installation holes of the top cover and secure it using the pan head screws. Connect the SSD power cable and SSD data cable.

Note: The cables shown in the image are for reference only and do not represent the actual length.

5. Secure the top cover of the device to complete the installation.
